Fernando Dreyfus 1:36 PM
Hello! Invites have been sent to the Stakehound members. Thank you all!

Harumi Urata-Thompson 1:56 PM
Thank you Fernando! This is a channel to talk about staking ETH as Roni and I are only the authorized personnel and have Albert and Edgars on the "recipient" end

Slackbot 2:04 PM
StakeHound has joined this channel by invitation from **Celsius**.

Albert Castellana 2:04 PM
was added to authorizations-celsius-stakehound by Fernando Dreyfus. Also, Fernando Dreyfus left.

Albert Castellana 2:15 PM
Hi everyone!

Edgars Nemše 2:15 PM
was added to authorizations-celsius-stakehound by Albert Castellana.

Edgars Nemše 2:29 PM
Hi all!

Harumi Urata-Thompson 9:49 PM
Edgars and Albert, as I have chatted with Albert, I like to move forward with minting 25k ETH to start. Since we haven't done this with you, I want to see how this goes with this quantity

We are only the authorized personnel (Roni and myself) to take coins from you, so this is one and only the channel to do this business. Under my direct command, there will be people on the coin deployment desk that will be touching the coins

Hi Harumi, that sounds good. I just want to confirm with you that the API proposal for buying stETH I've discussed with Dennis is fine with you as well. He suggested the second option listed in the document would be a good fit for you

At a high level:

- You give us a list of one or more whitelisted addresses you will be sending ETH from
- For each of those addresses, you also specify a corresponding address you would like to receive your stETH at
- Whenever you send ETH to our address from one of those whitelisted addresses, our system will issue you stETH to the matching address in our list

From your side it doesn't need to be automated, but it will give you a clear path to do so in the future if you want to

joined and left authorizations-celsius-stakehound. Also, Roni Cohen Pavon left. Jason and Connor Nolan joined.

Harumi Urata-Thompson 3:51 PM
Just for the record 1) Yes, I think this API method works 2) Jason will have to do a light KYC first but will mint 10k 3) we will separately mint 25k stETH

Jason and Connor can take it from here and I will be just reading the convo as it progresses

Albert Castellana 3:53 PM
Thanks for bringing everyone up to speed @Harumi - @Edgars Nemše @Redouane please let me know if you have any doubts !

Redouane Lakrache 3:53 PM
was added to authorizations-celsius-stakehound by Albert Castellana.

Jason 5:00 PM
@Albert Castellana I just called Harumi— confirmed that company (@Connor Nolan) will handle 2 separate mintings and direct the minted coins to 2 separate addresses given to you by @Harumi
Thanks

Connor Nolan 5:01 PM
these will be splits of 10k and 25k ETH

Albert Castellana 5:25 PM
Understood, so just for the record, this is Celsius's ETH being exchanged for stETH that will be sent directly to Celsius. (please @Connor Nolan confirm)

We will need the two addresses that you want those tokens to be sent to and you can send the eth to 0x607ebC82329D0CAc3027B83d15e4b4E816F131b7 (please @Edgars Nemše confirm), we will mint the stETH manually once the transfer is completed.

Edgars Nemše 5:26 PM
I confirm the address is 0x607ebC82329D0CAc3027B83d15e4b4E816F131b7

I can mint the stETH as soon as I have the 2 addresses and I see the ETH in our account

Connor Nolan 5:49 PM
can we have two separate addresses to send these to?

Connor Nolan 5:55 PM

I confirm the address is 0x607ebC82329D0CAc3027B83d15e4b4E816F131b7

I can mint the stETH as soon as I have the 2 addresses and I see the ETH in our account

February 2nd, 2021 ˅

Connor Nolan 5:49 PM
can we have two separate addresses to send these to?

Connor Nolan 5:55 PM
Amended on this. Please hold for further instructions (edited)

Connor Nolan 6:06 PM
All eth will come from this address going forward: 0xf0d54551a359D5b57B7035d847B5C8D8Eb374b73

All stETH can be returned here as well. will make this our primary address

so we are good to send 35k eth to 0x607ebC82329D0CAc3027B83d15e4b4E816F131b7 ?

☑ 1 😊

Albert Castellana 6:07 PM
Thank you @Connor Nolan

Edgars Nemše 6:08 PM
Good on our end

Connor Nolan 6:12 PM
ok will send a test now

Connor Nolan 6:22 PM
sent plz confirm amnt received

Edgars Nemše 6:23 PM
Confirmed, I see it in our accounts

0.01 ETH

Connor Nolan 6:28 PM
i sent that test from a different adress from the one given above, apologies. All rest will come from there

Edgars Nemše 6:30 PM
I see the rest as well

Starting the mint on our end

Done https://etherscan.io/tx/0x211182df69d6b20c598c639ca211a632d87a335f18bec5a5d68d20a64bef5d70

Connor Nolan 6:37 PM
received thanks

Harumi Urata-Thompson 6:39 PM
This is absolutely the fastest minting/redemption I have seen

Albert Castellana 6:42 PM
Thank you all for your support @Harumi @Connor Nolan @jason and @Edgars Nemše

We'll keep you posted as we setup the nodes and get everything up and running. The yield will be lower for the first few weeks as the nodes take a while to get online, but should be up to speed soon enough.

Connor Nolan 6:44 PM
great thanks!

Jason 6:45 PM
🙏
